German Attack at St. Eloi Was to Offset Defeat.

Whole British Press Commends Retaliation Plan.

(By Times Special Cable.)

London, March 18.—The only military activity along the East Prusian front appears to be the resumption of the German bondement of Ossowert. At this point the attacking batteries have been brought closer to the fortress, the reason being, socording to at longer range. The Russian reports maintain that the attacks on the fort have been successfully countered.

Petrograd claims that the Russians are holding their antagonists or almost the entire Pressures front where the Counter of the C

In the fort have been successfully countered.

Petrograd claims that the Russians are holding their antagonists and most the entire Pressays front, where the Germans are lerping up a violent artillery fire.

In the Carpshithma's and in Ge licin it is the usual story of attack and counter-attack, with Vienna claiming a slow advance after samunary assaults on mountain tops held by the Russians, while the Russians on the other hand maintain that they are more than holding their own in these regions. We eather conditions in the Carpshinas, where the snow in deep, make the movements of troops diffi-cult, men on sich being the only forces sale to operate freely. The Russians are bonharding Presurgal with heavy batteries, while the Autrians are still hammering away in their efforts to relieve the fortress.

on the western front the German attack on St. Eloi oridently on made to counteract the effect of the British success at Neuve happile. Berlin contents itself with claiming that progress has east made in this region, while Paris contends that the British have seen much their lost it makes there.
